Here is input for Wilcox.

Lab provided support and assistance to the removal assessment team. Issues related to SCRIBE and laboratory detection limit and dilution procedures were handled quickly with little impact to schedule. Data results were used to determine that no immediate actions were needed to protect residents.

Mike and Katrina, can you guys help me out with this exercise, please. Evidently, I need to say something about the great work the Houston lab has been providing us. I think I just need a one-liner on how Houston lab work supported our efforts at EVR Wood and Wilcox. Please give me such a one-liner for your respective sites.

Thanks.
Blake

Subject: Request for Information for ESAT Annual Report

Hi John,

As you are aware, for the past two years the Regional Science & Technology (RS&T) Directors submit an annual ESAT Report to OSRTI that highlights the work and accomplishments of ESAT during a given year. The report demonstrates the usefulness and benefits of the ESAT contract. It also allows HQs to see how their funds are being utilized (i.e. OSRTI funds the ESAT contract). The RS&T Directors and OSRTI has requested that the annual report include specific information, some of which I don't have access to; I'm hoping that you can provide some of the information.

The attached excel file contains three spreadsheets. Spreadsheet # 1 lists the Superfund sites where the Houston lab analyzed samples. Spreadsheet #2, list the SF sites analyzed through the CLP. Spreadsheet #3 has the Program Accomplishment Table (i.e. # of remedial site assessment completions, # of RA project completions, etc.) to be completed by you or your staff. I will also need to know the names of those sites to determine how many ESAT supported.

Also, each Region is asked to provide 3 to 5 write-ups that highlight the work that ESAT provided on high profile sites, high priority sites, or sites in general that were of extreme importance to the Region. On spreadsheet #2 (CLP), we highlighted five sites we believe are significant due to high level of ESAT support they required. These are just suggestions.

ESAT performed the prep of all Houston Lab samples and the analysis of some. They also performed data review on all CLP data packages. Please identify 3 to 5 sites where the samples were analyzed by Houston or the CLP and provide a brief background of the site and most importantly describe why the sample analysis was important; include any other information that you think is beneficial. I'll include the work and contributions made by ESAT.

Thanks so much for your help. This information is needed by **COB, March 29, 2016.**
